TOGAF® 10 – ADM CHEAT■SHEET (Phases, Artifacts, Deliverables)

ADM PHASES

Preliminary: Establish architecture capability, principles, governance

Phase A: Define vision, scope, stakeholders, constraints

Phase B: Business architecture (processes, capabilities)

Phase C: Information Systems Architecture (Data + Application)

Phase D: Technology architecture (infra, platforms, networks)

Phase E: Opportunities & Solutions (architecture roadmap)

Phase F: Migration planning (work packages, timelines)

Phase G: Implementation governance (compliance, reviews)

Phase H: Architecture change management (continuous evolution)

Requirements Management: Ongoing central process

KEY ARTIFACTS

Catalogs:

- Business Service Catalog

- Application Portfolio Catalog

- Technology Standards Catalog

- Data Entity Catalog

Matrices:

- CRUD Matrix

- Application Interaction Matrix

- Role■Responsibility Matrix

Diagrams:

- Context Diagram

- Network Diagram

- Process Flow Diagram

- Application Communication Diagram

DELIVERABLES

- Architecture Vision Document

- Business/Data/Application/Technology Architecture Deliverables

- Gap Analysis Report

- Architecture Roadmap

- Migration Plan

- Architecture Contract

- Compliance Assessment Reports

- Architecture Definition Document (ADD)
